

ALIGN ASPHALT CAPABILITY STATEMENT

OUR ORGANISATION

Align Asphalt is a family owned and operated business situated in Bayswater, Melbourne. We service the Melbourne Metropolitan area and Country Victoria.

Established in 2011 we have grown our business through building relationships with clients, trust, completing works within allotted timeframes and the quality of our finished product.

We currently work with companies including ALH Hotels, Metro Rail, Kaizen Civil and other construction companies. We also work with numerous schools both public and private and do various domestic work. We complete many jobs where we comply with the required local council specifications and regulations.

Although we are primarily an Asphaltting business, we also do line marking and work in with a reputable Concreting company and in partnership with them, we can provide a complete service if both Asphaltting and Concreting are required.

We endeavor to provide a full service to our clients from quoting the job and providing advice and service of drainage requirements right through to the completed product. We also have surveyors we use when required.

The work we have completed varies from small repairs in roadways in front of new crossovers, patches in driveways and carparks, trenches where services have been laid and also large carparks, basketball courts and roadways.

We recently completed the extension of the Honda Australia Rider Training grounds in Kilsyth an area of approximately 3000 square meters, this included all excavation, preparation, drainage works and asphaltting and the line marking after the asphaltting was completed. Amongst other recent works was profiling and a resheeting of over 1400 square meters at BMW Waverley and over 1500 square meters of carpark works at Stud Park Shopping Center.

As a company we adhere to the highest environmental standards, we dispose of any old or excess materials including all concrete and asphalt to registered recycling facilities.

All our employees hold a current First Aid Certificate, Working with Children and Rail Industry Workers ticket.

OUR PLANT

Our trucks include large and small tippers and a flocon truck, with trailers to suit. We have excavators up to 3.6T, a bobcat, both drum and multi rollers, profiling capabilities and an asphalt paver. All our equipment is regularly serviced, and service history and risk assessments are available through the Viper Safety System QR code accessible on all plant. Our SWMS are also available on the Viper system.
